

Survey Notes at a Glance

The text on this page describes the figure below it in plain terms, so the embedded image is meaningful rather than decorative. Captions are placed beneath each image and reference a labeled drawing that the converter should preserve.

Figure 1: The survey boat at anchor off the outer bar.

Following the figure, a short paragraph continues the report so the page mixes text and image content in the normal reading order, with the image between two text regions.

The text on this page describes the figure below it in plain terms, so the embedded image is meaningful rather than decorative. Captions are placed beneath each image and reference a labeled drawing that the converter should preserve.

Figure 2: Cross-section of the inner channel at the beacon line.

Following the figure, a short paragraph continues the report so the page mixes text and image content in the normal reading order, with the image between two text regions.

The text on this page describes the figure below it in plain terms, so the embedded image is meaningful rather than decorative. Captions are placed beneath each image and reference a labeled drawing that the converter should preserve.

Figure 3: The tide curve recorded over a single spring day.

Following the figure, a short paragraph continues the report so the page mixes text and image content in the normal reading order, with the image between two text regions.
